LinkedIn, GitHub, Portfolio

Junior Software Engineer with practical experience in Java and Spring Boot backend development, plus full-stack ownership across relational databases and modern frontend frameworks. Comfortable working autonomously in small, specialized teams, with a track record of independently learning new frameworks and technologies as projects require. Not afraid to learn new technologies.

Core Competencies

- **Backend Development**: Java, Spring Boot, REST APIs, relational database design (PostgreSQL, SQL)
- **Frontend Development**: React, TypeScript, JavaScript
- **Distributed Systems**: Docker, Apache Kafka, event-driven microservices
- **Additional Languages**: Golang, Python, Kotlin
- **Tools & Practices**: Git, pull-request workflows, GitHub Actions, TDD

Professional Experience

- **Instituto Tecnológico de Informática (ITI)** — **Valencia, España**
  R&D Developer — *Feb 2026–Jun 2026*
  - Implemented LLM-based improvements to a search engine
  - Built a multi-step agent converting natural-language questions into validated, read-only SQL queries against a PostgreSQL schema, including safety validation and error-driven retries
  - Worked autonomously within a small, specialized technical team

- **Instituto Tecnológico de Informática (ITI)** — **Valencia, España**
  Full-Stack Developer Intern — *Feb 2024–Jun 2024*
  - Developed and maintained the corporate personnel management application (Intranet)
  - Implemented new frontend features using React and TypeScript, improving internal usability
  - Contributed to backend development, ensuring smooth integration between services

Selected Projects

- **Kafka + Spring Boot Ticketing Platform**: Event-driven microservices (reservation, payment, notification, audit) built with Spring Boot 3 and Apache Kafka; outbox pattern, dead-letter topics, idempotent processing, Testcontainers integration tests.
- **English Learning API**: Spring Boot REST API with PostgreSQL persistence; JPA entities, DTOs/mappers, Jakarta validation, centralized error handling.
- **ValenMove**: Native Android app (Kotlin, MVVM) unifying Valencia's public transport into one real-time interface; reverse-engineered public APIs independently. Final Degree Project, grade 9/10.

Education

- **Polytechnic University of Valencia (UPV)** **Valencia, España**
  Master's Degree in Computer Engineering (MUIINF) *2024–2026*
  In progress (expected Sep 2026). Topics: distributed systems, high-performance computing, cybersecurity, embedded systems.
- **Polytechnic University of Valencia (UPV)** **Valencia, España**
  Grado (BSc) in Ingeniería Informática, Software Engineering track *2020–2024*
  GPA: 8.88/10. Thesis: "ValenMove - Unified Public Transport App" (grade 9/10).

Languages

- Spanish (native), Catalan (native), English (B2, confident conversational).
