Junior Software Engineer with hands-on experience building backend services in Java and Spring Boot, complemented by proven full-stack capability in React and TypeScript. Comfortable working across the stack on production-oriented applications, with a solid foundation in REST APIs, relational databases, and well-tested, maintainable code. Eager to deepen React expertise while contributing reliable Java from day one. Not afraid to learn new technologies.

Core Competencies

- **Backend Development**: Java, Spring Boot, REST APIs, PostgreSQL, JUnit/testing
- **Frontend Development**: React, TypeScript, JavaScript
- **Distributed Systems**: Docker, Apache Kafka, event-driven microservices
- **Additional Languages**: Golang, Python, Kotlin, SQL
- **Tools & Practices**: Git, GitHub Actions, Docker Compose, Testcontainers, TDD

Professional Experience

- **Instituto Tecnológico de Informática (ITI)** — **Valencia, España**
  R&D Developer — *Feb 2026–Jun 2026*
  - Implemented LLM-based improvements to a search engine
  - Built a multi-step agent converting natural-language questions into validated, read-only SQL queries against a PostgreSQL schema, including safety validation and error-driven retries
  - Applied disciplined, test-oriented engineering practices to a production-adjacent data-governance platform
- **Instituto Tecnológico de Informática (ITI)** — **Valencia, España**
  Full-Stack Developer Intern — *Feb 2024–Jun 2024*
  - Developed and maintained a business-critical corporate personnel management application (Intranet)
  - Implemented new frontend features using React and TypeScript, improving internal usability
  - Contributed to backend development, ensuring smooth integration between services

Selected Projects

- **Kafka + Spring Boot Ticketing Platform**: Event-driven microservices (reservation, payment, notification, audit) built with Spring Boot 3 and Apache Kafka; outbox pattern, dead-letter topics, idempotent processing, Testcontainers integration tests.
- **CourseAI**: Full-stack AI-powered SaaS platform; Go backend, PostgreSQL persistence, React/TypeScript/Tailwind frontend, Gemini API integration.
- **Monkey Interpreter & HTTP Server**: Hand-built lexer, Pratt parser, AST, and evaluator for a custom programming language, plus an HTTP/1.1 server built directly on raw TCP sockets with no external framework.

Education

- **Polytechnic University of Valencia (UPV)** **Valencia, España**
  Master's Degree in Computer Engineering (MUIINF) *2024–2026*
  In progress (expected Sep 2026). Topics: distributed systems, high-performance computing, cybersecurity, embedded systems.
- **Polytechnic University of Valencia (UPV)** **Valencia, España**
  Grado (BSc) in Ingeniería Informática, Software Engineering track *2020–2024*
  GPA: 8.88/10. Thesis: "ValenMove - Unified Public Transport App" (grade 9/10).

Languages

- Spanish (native), Catalan (native), English (B2, confident conversational).
